AHMEDNAGAR.

Area.—Four villages with an area of 27 square miles were transferred to the Poona Collectorate in 1887 and one village with an area of 5 square miles was added to this district from Poona. To meet these changes, and to accord with the measurement of the Revision Survey carried out in 1875—1900, the area of the district has been reduced from 6,666 (1882-83) to 6,613 square miles.

The area of land under cultivation in each táluka shown in the revenue accounts for 1910-11 is:—

Táluka.	Area in acres.	
	Cultivated.	Irrigated.

Important Public Works.—In 1910-11 there were 412 miles of metalled road and 426 miles of road suitable for fair weather traffic

only. The new roads and works of importance constructed since 1875 are as follows :—

Factories.—There are in all 18 cotton ginning and pressing factories in the District with 1,035 operatives. Of these 10 factories and 2 presses come under the Indian Factories Act. There is not sufficient work for all these every year and some of them generally have to be closed.

Famine.—Famine occurred in 1896-97, mainly due to failure of crops in the affected tracts from the want of seasonable rain. The whole district was affected. Relief works were opened and continued for 14 months. The maximum number of persons receiving relief reached 109,829 in September.

In 1899-1900 the rains failed, and the whole district was again affected with severe famine. Relief works were opened in 1899, the daily average attendance being 351, and were continued up to the end of October 1902, the crop outturn being only 25 per cent. of normal. In 1899-1900 the maximum number relieved was 269,415 (in June), 29,205 being in receipt of gratuitous relief. Special relief was also given to weavers in their own craft during the famine. The death-rate in the district was 66·11 per mille and the total number of deaths from all causes on relief works was 7,850, of which 3,792 were due to dysentery and diarrhœa and 1,031 to cholera. The percentage proportion of sexes and children among the relief workers in the district was 33 males, 49 females and 18 children. The average wage per worker unit was Re. 0-1-6. In 1900-01, the same area was affected as in the previous two years. The highest number in receipt of relief was 125,277 in July, 32,811 being gratuitously relieved. The death-rate during the year was 29·73 per mille. In 1901-02, 5,448 square miles were affected. The maximum daily average number relieved was 26,051, 14,426 being gratuitously relieved. The death-rate was 26·88 per mille. Famine occurred again in 1905-1906. Out of the total area of 6,586 square miles, 5,913 were affected. Relief works were opened in February and were continued till 8th September 1906. Gratuitous relief was given from December 1905 to October 1906, the daily average number relieved being 2,267 village servants and 3,773 decrepits. There was no epidemic disease on the works and the death rate remained normal. The percentage

proportion of sexes and children on relief works was 42 males, 46 females and 18 children. (For further details, see Table No. XIII.)

Plague.—The first indigenous case of plague appeared in Ahmednagar Cantonment in September 1897. The epidemic soon spread to the city, causing 250 deaths. It thence attacked the villages in Párner and Shrigonda tálukas. The district suffered severely in 1903-04 and 1904-05. The total mortality up to the end of 1910-11 was 37,860 or 4 per cent. of the total population :—
